BACKGROUND

Florida-licensed Registered Dental Hygienist with three years of international clinical experience in preventive and periodontal care: prophylaxis, scaling and root planing, periodontal assessment, digital radiography, oral-pathology screening, and patient education. Florida-certified to administer local anesthesia.

U.S. PREPARATION

60 hours of hands-on U.S. clinical experience at Advanced Dental Solutions, Pittsburgh: chairside flow, intraoral imaging, bitewings, periapicals, and HIPAA-aware records. Florida-certified to administer local anesthesia, completed through the University of Florida.

AT THE CHAIR

I work through periodontal charting, soft-tissue and radiographic findings, and patient history together, then explain findings to patients in plain language - in Nepali, Bengali, Hindi, or English.
